Response Param Information

KEY	TYPE	USE CASE
error	boolean	false when the request succeeded, true when it failed. Check this before reading data.
message	string	Human-readable failure reason. Present only when error is true.
requestId	string	Unique id for this call. Quote it when raising a support request so the call can be traced.
apiName	string	Which API served the request, e.g. PAN_TO_PAN_BASIC. Returned only on accounts using response format v2.
dateTime	string	ISO 8601 UTC timestamp of when the response was produced. Returned only on accounts using response format v2.
data.billableType	string	How the call was charged. - FULL: a record was found and the call was billed in full. - PARTIAL: no record was found and only partial credit was charged. - ZERO: nothing was billed.
data.creditUsed	number	Credits consumed by this call. Omitted if credit consumption info is disabled on your account.
data.currentCredit	number	Credits remaining after this call. Omitted if credit consumption info is disabled on your account.

Status Codes

CODE	STATUS	DESCRIPTION
200	Success	Request processed successfully.
400	Bad Request	Missing or invalid required parameter. Example: "PAN_Number" is required.
401	Unauthorized	Authentication failed. The Authorization token is missing, invalid or

CODE	STATUS	DESCRIPTION
401		expired.
402	Payment Required	Insufficient API credits. Please recharge your account.
403	Forbidden	You do not have permission to access this API, or the service is not enabled for your account.
422	Unprocessable Entity	The input was well-formed but could not be processed - invalid identifier, or no records found for it.
500	Internal Server Error	An unexpected server error occurred. Please try again later.
503	Service Unavailable	The upstream source failed while processing the request (errorType INTERNAL_ERROR). Please retry after some time.
